

Chronos 4K

*Uninterrupted Wireless
Jobsite Security, Day and Night*

Time Lapse Camera System

With our Chronos 4K advanced time lapse camera system, you can effortlessly create stunning time lapse videos using the on-board AI processor and desktop software. Set your parameters, and the software will handle the rest, balancing, stabilizing, and blending captured photos into a professional-quality time lapse movie.

Capture Your Jobsite in 4K

Showcasing a 4K UHD resolution, 110° wide angle lens, and remote access, Chronos 4K ensures access and control to your camera remotely from anywhere, at any time. Document details with vibrant color and remarkable clarity in every shot.

Ample Storage, Securely Accessed

Automatically back up your media to Google Drive in real-time, ensuring your photos and videos are stored securely. Equipped with a high-capacity 512GB memory card, Chronos 4K allows for extended recording durations and ample storage.

About AI Site Cam

We are a leading provider in the technology and security camera systems industry, specializing in innovative solutions for construction site monitoring.

AI Site Cam allows for real time access to site progress, archival footage, and enhanced security measures, all accessible through your mobile device or desktop PC.
