

# PlateSmart Pro

**Monitor Access with Precision**

## License Plate Recognition System

Protect your job site or property with our advanced surveillance solution that ensures you know who enters and leaves. Our 1080p resolution high-speed camera specializes in license plate recognition, recording data directly into the LPR software for easy access.

### **Know Who Arrives & Leaves**

Receive real-time alerts sent straight to your desktop or mobile device. Get records detailing who has entered and exited, create a list of accepted vehicles so you are alerted when a non-approved vehicle enters the site.

### **IR & 2-Way Audio Equipped**

Equipped with built-in infrared illuminators, the camera operates effectively even in complete darkness. Two-Way audio, live video and being solar-powered means continuous operation without the need for wiring or AC power. It's compatible with both Wi-Fi and secure 4G/LTE connections, providing flexible and reliable monitoring for your security needs.

### **About AI Site Cam**

We are a leading provider in the technology and security camera systems industry, specializing in innovative solutions for construction site monitoring.

AI Site Cam allows for real time access to site progress, archival footage, and enhanced security measures, all accessible through your mobile device or desktop PC.
